Preface vii

General Articles

Effects of invertebrate predation on the seasonal succession of a zooplankton community: a two year study in Lake Aydat, France
by Nicole Lair 1

Invertebrate zooplankton predator composition and diversity in tropical lentic waters
by Constantine H. Fernando, Claudiu Tudorancea & Seyoum Mengestou 13

A comparison between predation effects on zooplankton communities by *Neomysis* and *Chaoborus*
by Takayuki Hanazato 33

Cyclomorphosis in *Daphnia:* an adaptation to avoid invertebrate predation
by Joanna Pijanowska 41

Progress towards characterization of a predator/prey kairomone: *Daphnia pulex* and *Chaoborus americanus*
by Ken Parejko & Stanley Dodson 51

Flatworms

Typhloplanid flatworms (*Mesostoma* and related genera): Mechanisms of predation and evidence that they structure aquatic invertebrate communities
by Leon Blaustein & Henri J. Dumont 61

A laboratory study of the feeding of *Mesostoma lingua* (*Schmidt*) (Turbellaria: Neorhabdocoela) on *Daphnia magna* Straus at four different temperatures
by Henri J. Dumont & Stefan Schorreels 79

Predation on and by pelagic Turbellaria in some lakes in Brazil
by Odete Rocha, Takako Matsumura-Tundisi, José Galizia Tundisi & Claudia Padovesi Fonseca 91

Laboratory observations on the vertical distribution of a tropical pelagic flatworm (*Mesostoma* sp.) in relation to satiation
by Luc De Meester & Henri J. Dumont 103

Branchiopoda

The feeding behaviour of *Leptodora kindti* and its impact on the zooplankton community of Neusiedler See (Austria)
by Alois Herzig & Brigitte Auer 107

On predatory tendencies in the feeding ecology of the fairy shrimp *Streptocephalus proboscideus* (Frauenfeld, 1873) (Crustacea: Anostraca)
by Johan Mertens, N. Munuswamy, Christine De Walsche & Henri J. Dumont 119

Copepods

Estimating predation risk in zooplankton communities: the importance of vertical overlap

by Craig E. Willamson & Mark E. Stoeckel 125
An analysis of prey selection by *Mesocyclops edax*
by Anthony Janicki & John DeCosta 133
Predation on *Ceriodaphnia cornuta* and *Brachionus calyciflorus* by two Mesocyclops species coexisting in Barra Bonita reservoir (SP, Brazil)
by Takako Matsumura-Tundisi, Arnola C. Rietzler, Evaldo L. G. Espindola, Jose G. Tundisi & Odete Rocha 141
Some aspects of vulnerability to cyclopoid predation of zooplankton prey individuals
by Kennedy Roche 153
Spatial overlap of a predatory copepod, *Acanthocyclops robustus*, and its prey in a shallow eutrophic lake
by Kennedy Roche 163
Coexistence of the predatory cyclopoids *Acanthocyclops robustus* (Sars) and *Mesocyclops leuckarti* (Claus) in a small eutrophic lake
by Gerhard Maier 185
Chaoborus
Creating conditions for changes in prey community structure by *Chaoborus* spp. in a lake in Sweden
by Jan A. E. Stenson 205
Chaoborus predation and zooplankton community structure in a rotifer-dominated lake
by Karl E. Havens 215

Water Mites
Can water mites control populations of planktonic Cladocera?
by Vladimir F. Matveev & C. C. Martinez 227

Epilogue
Summary of final round-table discussion on current issues in research on freshwater invertebrate predation
by Doris Soto 233
Index 237
